# A Warm Welcome to Aperture Energetics!

Internationally based and family owned and operated, Aperture Energetics provides licensed healing arts' practitioners with pure, effective and sustainable, hand crafted, natural products.

As a true professional remedy company, Aperture Energetics only trains, markets and sells to qualified health care practitioners (never online or through health food stores, etc!) who are required to provide a copy of their certification, license or diploma.

We know that there are literally hundreds of nutritional, botanical and homeopathic companies worldwide, offering products according to their highest vision. Thank you for considering us.

The Physica Energetics' natural product lines are currently available throughout North America, United Kingdom, Europe, South and Central America, Australasia, Japan, Korea, China and India.

These remedies, about which you are to discover, emerged over 40 years ago, through a deep respect and appreciation of time-honoured laws and principles. Practitioners of all backgrounds will enjoy the artistic melding of ancient traditions and well researched, evidence-based science, which provides the foundation for our life's work. These wonderful products have been meticulously designed to expand your healing influence.

Physica Energetics offers a wide range of hand crafted, Spagyric botanical tinctures created from organic, wildcrafted or biodynamic farming sources as well as hand potentized homeopathic tinctures as per Hahnemann. Our nutritional products also clearly carry the signature of our personal concern for the well being of your patients. Together, these formulas draw inspiration from the natural medical approaches of Europe, North America, China (TCM), Tibet, Ayurvedic India, Australia, Russia, the Philippines, and South and Central America.

Practitioners, who may be new to this approach, will find these remedies integrate seamlessly into their existing practices as the Causal Chain Factors (organs, systems, etc.) known to play central and synergistic roles in the condition being addressed are included as embedded features within the formulas.

Aperture Energetics is clearly a unique company. Many of our practitioner customers refer to us as "a breath of fresh air" in the international healing arts' community. We're proud of that, particularly as we are now entering into this new era of health care where the dominant emphasis is rightly on integrative and preventative medicine – Healing for the Pattern of Life™.

We've been looking forward to this day as it brings us yet another step closer to fulfilling the purpose of our company, as revealed through the text and essences of this introductory, welcome catalogue.

We look forward to becoming an integral part of your practice and to the privilege and responsibility of a long term partnership.

Sincerely,

Your Friends & Colleagues at Aperture Energetics

*How do quantum effects like coherence and "quantum non-locality" during consciousness fit into get translated into biological systems?*

We are entering into an exciting discovery of a substance that is half way between spirit and matter – The Field

*Hans Reckeweg MD* reminded us that inherent in the “disease” is the cure (as did Hahnemann), and that the body’s response to the presence of a xenobiotic is a healing strategy, whereby the body is attempting to 1) halt the progression of forced entropy and

George Meinig DDS (our family dentist when I was practicing in Southern California) re-focalized the work of Weston Price DDS and reminded dentists of their

nutritional heritage and front line medical responsibility, as did *Royal Lee DDS* and *John Courtney*.

The mandate “*primum non nocere*” seems to have been lost in the swirl of high drama, present day, technological medicine. We do not wish to decry modern conventional medicine, for we really do owe a great debt to these amazing men and women, their protocols, technologies, and medications that have saved so many lives on the battlefield.

However, since the majority of our lifetime is not lived on a battlefield, is it not reasonable then to consider that other approaches might be successfully implemented in “times of peace”?

The Spirit and acumen of countless, brilliant European, Chinese, Tibetan, Ayurvedic, North, South, and Central American traditional medical practitioners are sensitively and respectfully included in the Physica Energetics’ remedy line.

We invite you to study the contribution of these great men and women, energetically living through the core design of these products. All are illustrative of the Legacy of the One Central Principle, inexorably weaving its way throughout time.

So, let’s clothe the Legacy wisely, in accordance with its laws and principles and in the process, we’ll allow for a noble melding of ancient wisdom in accordance with the requirements and necessities of this current time and cycle.

To accomplish this requires a fierce sense of purpose, an open mind, an open heart, and a keen willingness to explore proven protocols of the past and uniquely innovative approaches prepared specifically for the times now in which we find ourselves.

What could be more exciting... and fulfilling!!"

# Pure, Effective & Sustainable Professional Products

## Healing for the Pattern of Life™

As a Healing Arts' Practitioner, you are constantly working with the challenges of an ever increasing xenobiotic burden in the lives of your patients. Added to that, are the ever changing legalities and requirements being placed on our industry as a whole. With these factors in mind, Physica Energetics has sought out partnerships with a wonderful and diverse grouping of clinical and regulatory experts to provide you with the best available products, clinical and technical support for your practice.

You will discover, as have thousands of practitioners, that Physica Energetics' products are well positioned for a seamless integration into your practice. Our clinical and practice consultants are always on hand and ready to assist practitioners new to this approach as well as seasoned clinicians.

## Over 150 Products Are Available to You

We formulate and manufacture over 150 products that are used by practitioners worldwide, working with a wide range of healing arts' modalities. Our products include hand-crafted, organic and wild-crafted Spagyrically processed botanical/homeopathic formulations and accompanying innovative, synergistic nutritionals. Physica Energetics breathes a breath of fresh air of viable options into the multitude of diverse natural healing fields within which we serve our patients.

## A Unique Choice in the Natural Remedy Field

From the beginning, our primary goal has been to reunite the often sidestepped, or even overlooked, natural blending of Art and Science. We have taken great care in our formulating, manufacturing and educational processes to once again establish this precedent for our industry.

## The Union of Art and Science

Metabolic and energetic pathways both must be carefully and expertly balanced to create a product which addresses the concerns of body, mind, and heart. Whereas certain ingredients may be scientifically researched and well known for their healing potential, when they are combined into a complex formula they may create energetic conflicts as well as metabolic imbalances. This is where the "art" of formulation plays such a significant role.

(Unlike many companies seeking a market niche, we are not an advertising and labelling company looking to just sell products)

The successful, synergistic blending of art and science results in a product which is sound both in heaven (physics) and in earth (chemistry), as the old masters of alchemy used to describe it. As such, the number of products required to achieve the end result is reduced and remarkably free from retracing symptomatology.

## Education

Pure, effective, professional products and efficient, personalized customer care is essential for a rewarding business relationship. However, the foundation for a sustainable, forward moving business and practice clearly requires innovative, forward moving education to stay ahead of clinical trends and advances.

Physica Energetics' clinically-based seminars, conferences, online webinars, practitioner consultation, mentorship programs, detailed reference literature, 50/100 hour Advanced EAV Courses, Master Classes and other accredited courses will keep you current, fresh and inspired. Our core, central concern is education. Sales, while important, are secondary.

## Practitioner Feedback

We wholeheartedly welcome practitioner feedback from multi-discipline clinicians throughout the world. For many years now, practitioners have come to rely upon us in our role as a valued focus through which patterns, trends and innovative ideas may be seamlessly integrated into their active practices. The international Physica Energetics' community of practitioners enjoys the privilege of a warm and professional partnership with practitioners sharing an enthusiastic passion for the health and welfare of our patients in our rapidly changing world.

## Competitive Pricing Model

We will not produce a product unless it is safe, effective and affordable to our practitioners and their patients. Therefore one of our primary concerns is to maintain a responsible and reasonable *price: quality: quantity* ratio. We are also very conscious of protecting the design and model of a healthy revenue stream for our practitioner customers. Included in this model is our 100% pledge that these products are only available through certified healing arts' practitioners and not via the Internet, health food stores, etc.

# Primum Non Nocere (*First, do no harm*)

## We take this very seriously!

**No bar codes:** We understand the attraction of using bar codes for inventory control purposes... but not with the Physica Energetics' remedy line! Why run the risk of creating yet another disruptive, energetic interference pattern?

**No magnesium stearate and toxic flow agents:** Flow agents are a necessity for the encapsulation process for without which the ingredients do not flow evenly into the capsules. However, it is estimated that 90% of the nutritional supplements that are consumed today contain magnesium stearates and/or other toxic binders, fillers, excipients and flow agents. Either nutritional companies are uninformed or they opt for the less expensive agents such as magnesium stearate, stearic acid, talc, sodium benzoate, silicon dioxide, cellulose starch (contains MSG), palmitates, non-veggie gelatin capsules, etc. - all of which are proven toxins! We make a clean remedy... without inflating the price.

Physica Energetics' products are 100% FREE of toxic binders, fillers, excipients and flow agents.

**Veggie Caps:** Vegetarian capsules are considerably more expensive than most tablets which tend to be filled with glues and binders and processed under hardening pressure and heat. They are also considerably more expensive than gelatin capsules made from animal parts and toxic preservatives. Nevertheless, we feel strongly that veggie caps are well worth the extra effort and investment on our part without adding additional cost to you or your patients.

**Sourcing:** A great product always begins with exceptional raw materials. Our botanicals are organic, wildcrafted or bio-dynamically grown. Sometimes organic sources are frankly just not available. However, as with our nutritionals, we will always use organic raw materials where available... and they are never irradiated! The exceptional sourcing, in concert with our unique processing methods, ensures that your patients will receive the purest and most bio-available product possible. Our homeopathic preparations are all derived from mother tinctures, hand succussed and potentized per Hahnemann.

**BPA Free:** BPA free (bisphenol A) is essential to Physica Energetics as we always want to protect the integrity of our non-toxic products and this is why we have chosen to ensure all our white bottles are BPA free. The HDPE bottles are free from contaminants keeping our products

safe and protected, not just from the plastic but outside elements as well.

**A Green Carbon Footprint:** All orders are hand packed with a conscious concern to maintain the vibratory field of the products in our climate controlled and atmospherically peaceful, shipping and receiving warehouses and offices.

We use 100% eco-friendly, biodegradable packing peanuts when shipping your order. Our manuals and catalogues (including the one you're reading now) use vegetable based inks and are 100% chemical free.

Our printing company is Forest Stewardship Council (FSC) certified which is the only forest certification standard supported by organizations such as World Wildlife Fund of Canada, Sierra Club of Canada and Greenpeace.

**Manufacturing and Quality Control:** Our facilities are registered, licensed and certified by outside agencies that independently certify our compliance with industry guidelines, government regulations and quality assurance practices. Canadian laws are among the most stringent in the world!

**Health Canada/FDA Inspected:** Our facilities operate under strict Good Manufacturing Practices (GMP). We are proud to have received independent GMP verification by NSF International. Our kosher and halal approved facilities have been audited and approved by leading independent authorities.

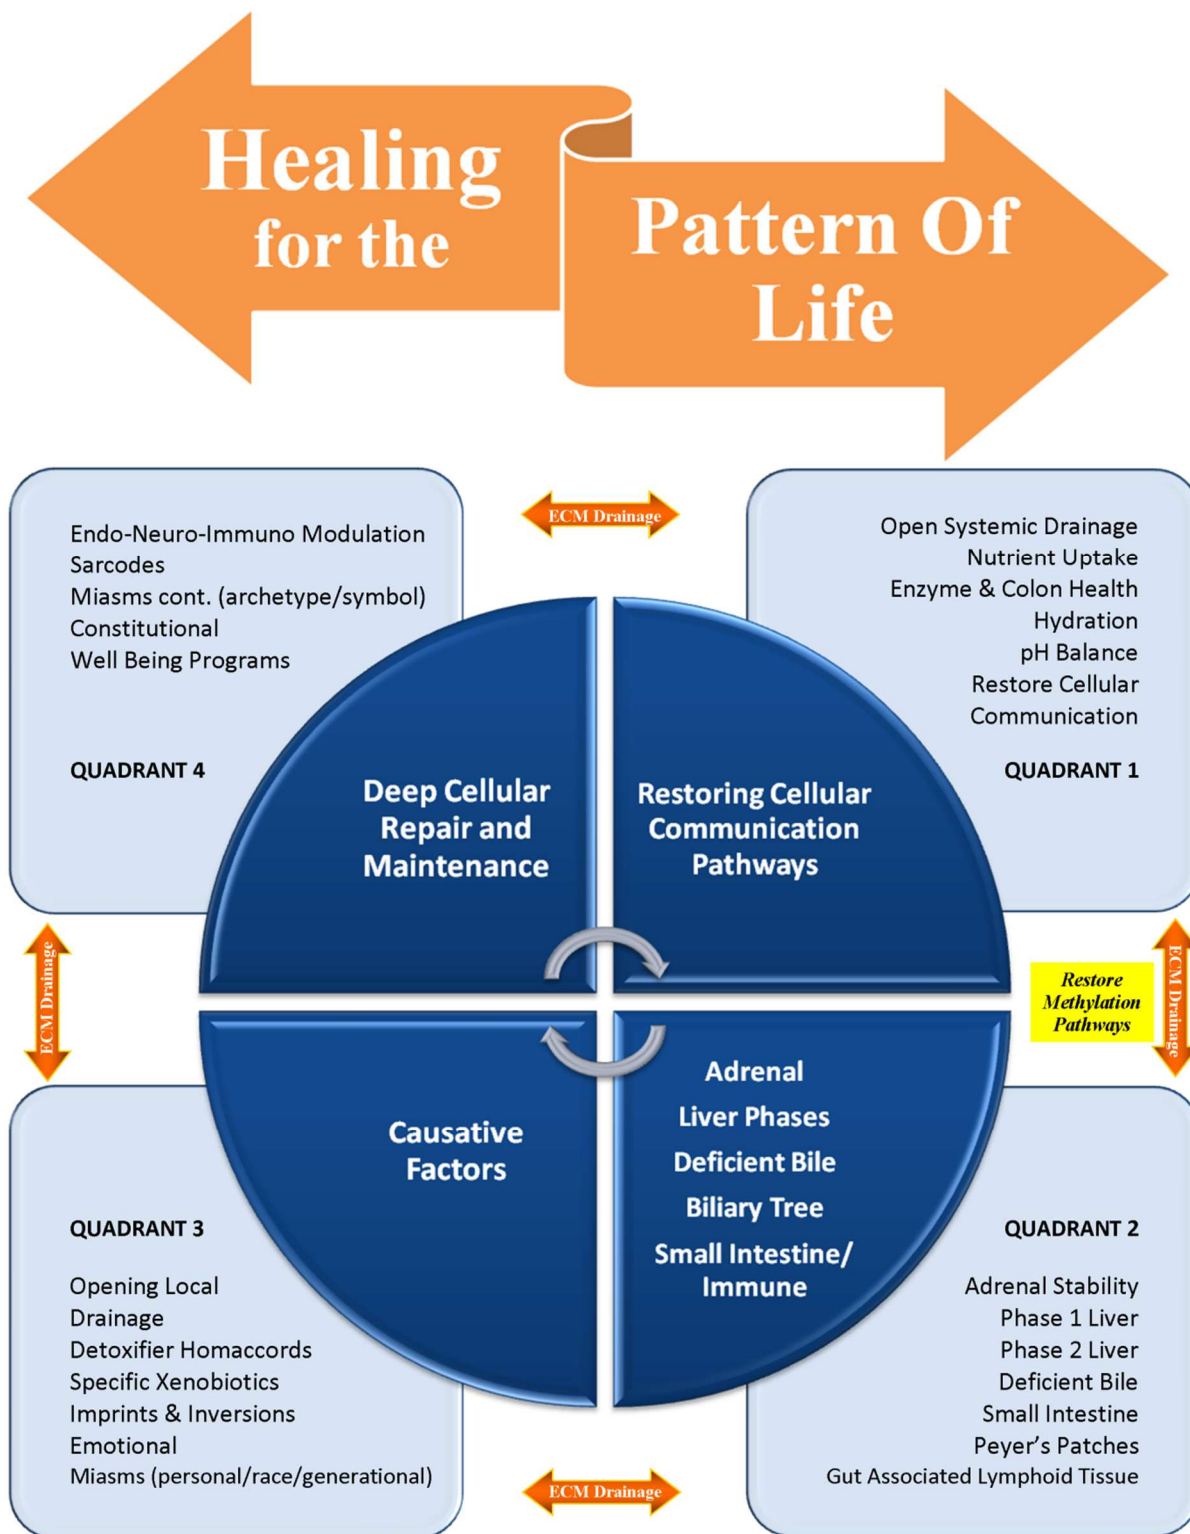

**Quality Engineering:** Physica Energetics quality is engineered into every product. From raw material analysis to final product inspection, every production step is carefully monitored and documented, with full accountability and in-process controls.

**Third Party Analysis:** Physica Energetics contracts Canadian Analytical Labs™ for regulatory and verification assay analysis.

**Testing:** Our testing includes identity and potency of actives, pesticides, heavy metals, microbiology, moisture, stability, odour and taste, and other specialized testing where indicated (e.g. glandulars, liposomes, lotions, etc.).

Our technical services, analytical, quality control and quality assurance groups offer a superior level of excellence in scientific support that's rare in this industry.

**Certificates of Analysis and Lab:** These are available for your review on our website: [www.physicaenergetics.com](http://www.physicaenergetics.com)

# Healing for the Pattern of Life™

## A Primary Foundational Template

The 'Healing for the Pattern of Life™' design provides us with a practical and foundational template for our work as healing arts' practitioners in the field of BioEnergetic Medicine. This design outlines four main phases through which we progress our patient/clients to ensure clarification of the intra and extracellular matrix, organ and system support, and the nourishment, drainage and detoxification of cells and tissues. Additionally included in this overall design are gateways leading to the successful resolution of the emotional, mental and subconscious aspects, necessary for the healing process.

The first step in any healing strategy clearly requires the establishment of a strong foundational platform, designed to encompass proper nutrient uptake, adequate hydration, balanced levels of trace minerals and electrolytes, optimal pH and so on. The Restoring Cellular Communication Pathways™ program was designed specifically to address these factors in preparation for deeper, focused detoxification. The RCCP program gives us our starting point.

We must also ensure that the *systemic drainage pathways* (BioToxicosis lymph drainage 1, 2 & 3), are open while simultaneously supporting and nourishing the digestive and eliminatory organs. You will find that throughout the healing process the ECM (extracellular matrix) needs to be kept decongested and flowing. Here is where the three systemic lymphatic drainage remedies are an absolute necessity.

The second step towards stabilizing the foundation requires deliberate and specific support of the adrenal glands, liver/biliary tree, further support of the small intestine immune/digestive pathways (*GALT Fortifier*) and methylation stabilization (*Methyl-B12 Liposome Spray*). The adrenal glands are central to the management of the stress response, both physiologically and psychologically, affecting all of the hormones in the endocrine chain and subsequently playing a significant role in most body chemistries. Detoxification processes can cause a breakdown in endocrine function and deregulation of the stress response if there are imbalances here.

You will find that *Adrenal LF*, *SpectraLyte*, *Omega GOLD* (or *Bio-Omega 3*), *Vitamin B Coenzyme Complex Liposome* and *Licro Intrinsic* are particularly useful to help stabilize the adrenal glands at this stage and throughout continuing

treatment protocols. Simultaneously, liver detoxification phases also need to be stabilized prior to deeper detoxification, as failure to support these pathways will cause a greater toxic load and congestion within the extracellular and intracellular matrices.

We use *HepataGest* powder at this stage, as it was specifically designed to work with Phase I, II and III (deficient bile) liver detoxification pathways emphasizing clarification of toxic intermediate metabolites. We may also add other phytonutrients, including enzymes (*CataZyme-7* or *Hypo Zymase*) and right spinning probiotics (*Flora Syntropy*).

The clinical thinking here is that if the liver and the adrenals are not sufficiently stabilized once the detoxification process begins, toxins may be driven deeper, the ECM becomes increasingly congested, energy becomes depleted and the patient suffers via unnecessary retracing (or regressive vicariation) symptoms

as per Reckeweg and illustrated throughout the chart of Chronic BioToxicosis. This is hard on both the patient/client and the practitioner.

Once cellular communication and methylation cycles/pathways (*Methyl-B12 Liposome Spray*) have been re-established and the adrenals and liver are holding, we can safely progress to the identification and resolution of causative factors. Therapy at this stage includes opening the *local drainage pathways* (liver, kidney, lungs, etc.), through the implementation of decongesting and draining Spagyric botanicals (Intrinsics) and nosode homaccord detoxifiers (note Mesenchyme 6X, 9X, 6CH sarcodes and homeopathic ATP 5X are included in the formulas to demonstratively reduce retracing/regressive patient experience of past symptomatology), to address mental and emotional factors, miasms, and specific xenobiotics. This is the stage where experienced practitioners spend the majority of our time as we seek to remove various layers of the toxic burden through causal chain modification protocols, filters, dilutions, imprinting, inverting and so on.

In the culminating stage, as the causative factors are no longer an issue, additional support in the form of sarcodes therapy, constitutional remedies, and maintenance programs supportive of cellular repair and maintenance are implemented to ensure the pattern holds.

*A good maintenance program could include electrolytes and trace minerals (SpectraLyte), adrenal and liver support (Adrenal LF, Vit B Coenzyme Complex Liposome, Omega GOLD, Licro Intrinsic, HepataGest), and a high quality nutritional support (Vita LF and/or BioHealth Matrix). Most of us use ReHydrate in every litre of water we drink. Reviewing and understanding this Design Template will give you a good feel for the process which will be the foundation of your protocols and therapies as you gain experience in the field and service of BioEnergetic Medicine.*

## Causal Chains

*It could be said that causal chains are infinite. In homeopathic and most healing arts' approaches which affirm "as above, so below", nothing is a closed circuit or an island unto itself. Everything that has life plays an integral part within the Whole, albeit mainly unseen.*

In clinic, we may refer to conditions in terms of cloaked or causal chain disturbances, indicating that there are many factors working in the "flow system" as compensations for causative xenobiotics (physical, mental and emotional). Addressing the core issue is a specific process of providing correct substances 1) at the right level 2) at the right time and 3) within the right sequence. With this in place, compensatory mechanisms and causative xenobiotics may be effectively addressed without creating further damage or suppressing release pathways.

***Physica Energetics' formulas have been meticulously designed to reveal and correct causal chain patterns.***

Inherent in each remedy are ingredients chosen for their ability to accurately and synergistically address underlying core issues (inner disturbances), while simultaneously providing direction in the form of 1) terrain clarification, 2) drainage, 3) nourishment and 4) correcting resonances for the outward expression (see diagram). Seasoned practitioners as well as practitioners new to this approach, enjoy the fact that causal chain patterning is specifically included as a determining factor in each remedy formula.

To fulfill the requirements of providing for causal chain relationships often involves the integration of natural medicinal ingredients from international traditions and sources beyond the typical Western approach. Practitioners today find themselves increasingly challenged by non-localized, polysystemic complexities and conditions in their patients, necessitating a greater range of encompassment.

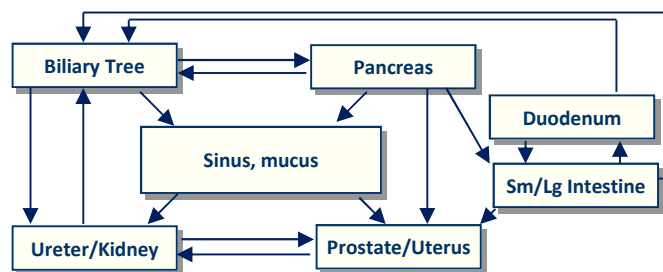

Physica Energetics has the ability, and indeed the mandate, to formulate pristine products designed specifically to accommodate our constantly changing wellness landscape. Experienced remedy design, specific and accurate to this unique approach, is absolutely vital and central to successful causal chain and cloaked disturbance clarification.

### Principles of Causal Chain Remedy Design

1. Focalize purpose through core ingredient key function
2. Differentiate the core via synergistic complements
3. Constellate the core differentiation through expansion
4. Amplify the central core function in greater potency

# Remedy Design

Every product (homeopathic, botanical and nutritional) has a specific target or focalizing ingredient conveying the primary function at the core of the formula. The purpose of the core ingredient indicates function. The expanding differentiation can now amplify the core function as it emerges through a constellation of increased activation, necessary to address causal chain and cloaked disturbances.

1) The core ingredient **FOCALIZES** the purpose of the remedy.

2) Complementary and synergistic ingredients **DIFFERENTIATE** the primary ingredient.

3) The newly formed **CONSTELLATE** expands and further differentiates to emerge as a highly activated remedy.

4) The completed remedy is a potent **AMPLIFICATION** of the core purpose that includes and encompasses clinically-specific *causal chain* factors.

## **Artemisia Intrinsic** **Spagyric (ethno) Botanical Tincture**

Betel Nut, Black walnut hulls/green, Clove oil, Garlic, Grapefruit seed extract, Papaya leaf, Pumpkin seed, Quassia picrasma excels, Senna, Shi jun zi, Torрея seed, Wormwood

# Your Pharmacy or Medicinary is a Direct and Central Extension of Your Core Healing Intention

The idea of regularly having products shipped directly to patients may initially seem appealing. After all, space is sometimes limited; there is an initial financial investment; inventory needs to be monitored and so on. However enlightened and experienced practitioners know that not having remedies readily available in-house is 1) clinically, 2) energetically and 3) financially, highly inefficient.

Of course, with most remedy companies who are more corporate-centered than healing-centered, it doesn't really matter. Yet with companies whose remedies and approaches honour and respect the Heart of the Legacy it's a completely different matter. Remember, DIRECTLY handing a product which has been safely nested in your practice TO your *patient carries the primary current and intention of your work, energetically imprinted into each bottle*. This is central to patient compliance, for as each time you or your staff directly presents the patient with the perfect remedies, your patient consciously and in other ways, feels *your assurance and confidence in their healing process, imprinted deeply into them*. Of course, on occasion you may need to drop ship, but experienced practitioners know the value of the "personal touch".

Oh yes, and **NO BAR CODES** please! We understand the attraction of using bar codes for inventory control purposes. Why run the risk of creating yet another disruptive, energetic interference pattern. And while we're at it...no magnesium stearates and other toxic chemical binders and fillers...."First, do no harm!"

**Here is a sample** of what the Physica Energetics' international community of practitioners recommends as a very basic introductory and foundational pharmacy. Other specific nutritionals, botanicals and homeopathics are added to this foundation based upon type and scope of practice. Note: the first 7 products are also key ingredients in the "case opening" Restoring Cellular Communication Pathways™ programme. Have several sets of these 7 products on hand as well as several of these products as individual products, (see RCCP pg. 23). The next 3 (Lymphs) are central to BioToxicosis, (correct systemic lymphatic drainage appropriate to the condition). The remaining products are core to every practice.

## Materia Medica in Brief - Physica Energetics' Products

---

- 1) **2 oz. Spagyric <sup>ethno</sup> Botanicals** (INTRINSIC)
  - Contains all of the naturally occurring factors that function synergistically on many levels simultaneously
  - Spagyric botanicals expand on the effectiveness of homeopathy and nutrition
  - They act by decongesting, repairing, and rebuilding organs and systems of the body
  - High frequency botanicals from highest quality sourced ingredients (biodynamic, wildcrafted, organic)
- 2) **2 oz. Detoxifier Homaccord Tinctures** (TOX)
  - Stimulate the body's natural immune response via the process of "Hormesis"
  - Clears both the physical and bioenergetic components of the disturbance
  - Removes "rigid" signals
  - Assists in the detoxification and drainage of the xenobiotic(s), and their toxic by-products
  - Attenuated/homaccords provide for correct target-specific homeopathic ascendancy cascade and sequentially addresses target causal chains
- 3) **2 oz. Drainage Tonifiers** (MILIEU)
  - Drainage is central to the healing process
  - Provide homeopathic drainage at the point of focal interference
  - Provides direction-accurate **local and systemic** drainage (Bio-Toxicosis)
  - Prevents translocation and absorption of toxins during detoxification
- 4) **2 oz. Organotherapy / Sarcodes** (CODE)
  - Homeopathic support and correction of specific organs, tissues, and secretions
  - Provides the body with a blueprint of healthy tissue for the return of proper function
  - Works to balance hypo and hyper conditions
  - Organotherapy has tri-phasic activity via correcting therapeutic dilutions:  
low potency 4-6CH stimulates; medium potency 7CH regulates and balances; and high potency 9CH inhibits
- 5) **2 oz. Ultimate Flowers** (FIELDS and RESCUE)
  - Emotional Flower combinations to assist in resolving the emotional aspects of disease
  - Can be specifically custom potentized or custom grafted to provide a superior, custom remedy
  - Pineal and Thymus sarcodes support the endocrine and subconscious/vibrational pathways
- 6) **2 oz. Ultimate Phenolics** (PHENOLICS)
  - Phenolic Homaccord. All 37 phenolics are bioenergetically available for imprinting
  - Can be specifically custom potentized or custom grafted to provide a superior remedy
  - Pineal and Thymus sarcodes support the endocrine and subconscious/vibrational pathways
- 7) **Topicals**
  - Liposomal based, target-specific, causal chain, clean topicals
- 8) **Matrix Nutritionals**
  - Resets and re-seeds nutrient uptake factors
  - Unblocks and provides support for the biological foundation, terrain and methylation pathways
  - Stabilizes the biological terrain during active detoxification, drainage and maintenance
  - Replenishes and decongests missing nutritional pathways eg. enzymes, probiotics, etc.
  - Replaces and re-establishes lost minerals, vitamins, enzymes, amino acids, etc.
  - In order to leverage the "higher ranges", there needs to be stability in the "lower ranges"

# Chronic BioToxicosis

*BioEnergetic practitioners of all approaches agree: every step in the processes of detoxification must address potentially recurring lymphatic congestion if “obstacles to cure” are to be clarified.*

Dramatic increases in poly-systemic conditions continuously present themselves in our clinics, due in part to the rise in environmental toxicity, compromised food and water supplies, poor genetic building material and mental and emotional disturbances.

All aspects of body, mind and heart are constantly in motion, seeking balance. BioEnergetically speaking, every reaction (symptom) is energetically and biologically goal oriented and as such, assists in the detoxification of the system and in the repair of damage created by xenobiotics.

Symptoms are healing strategies, clinically speaking, generated by the Vital Force in an attempt to either bring resolution at the level of the disturbance or failing that, prioritize cascading drainage and detoxification of the offending xenobiotic, at levels (usually deeper) where it can be clarified.

Most practitioners now agree, that recommending a generalized lymphatic drainage remedy no longer carries the restorative authority it once did.

In fact, suggesting a generalized lymphatic drainage remedy can often yield a suppressive therapeutic result, which is the antithesis of what practitioners are seeking to accomplish.

Specific drainage at the right level, at the right time and in the right sequence is what is required. (see diagram above)

Accurate, correct prioritization with respect to the lymphatic system and ECM (extra cellular matrix) is required in every step of the healing process to ensure a safe and confident restorative result as per Hering's Law (*very abbreviated*):

Healing occurs:

- 1) from deep to superficial
- 2) from "more important" to "less important" organs and systems
- 3) in the reverse order of their occurrence and
- 4) from the top of the body towards the feet

**Enlightened practitioners will always choose an appropriate Lymph BioToxicosis remedy to accompany their nutritional, homeopathic and botanical recommendations**

# LYMPH BIOTOXICOSIS PRODUCTS (3)

**Lymphatic Drainage is vital to every healing program**, as the lymphatic system is an integral part of the extracellular matrix (ECM). Cells cannot heal when the ECM is compromised. Each of the Lymph BioToxicosis drainage products, given at the correct time in the sequential cycles of restorative healing, will 1) substantially reduce the challenging effects of xenobiotic translocation, and 2) significantly soften and often eliminate many of the symptoms of regressive retracing.

# An Introduction to Restoring Cellular Communication Pathways™

For those who have been following the latest breakthroughs in biology and nutrition, it is clear that cellular communication is absolutely vital when it comes to establishing and maintaining a healthy body, mind and heart. According to cellular biologists, cellular communication happens by way of receptor cell membranes, confirming that proper cellular communication only occurs when cell membranes are clear of "obstacles to cure" as per Hahnemann.

The workings of a suitable environment for cells known as the extracellular matrix (ECM) and ground regulation, has occupied the European medical tradition since the early part of the 20<sup>th</sup> century. Cellular pathologists and biochemists have long sought to map networks of cell communication and microcirculation in the ECM. It is now clear that the first signals of xenobiotic interference register in the connective tissue.

In the early 1950's, Rheinhold Voll MD, the originator of EAV/EDS identified this fundamental premise in terms of mesenchymal confluence. He found, as did Fritz Popp, that obstacles to cure revealed themselves as measurable "additional oscillations" in the meridian pathways.

In 1975, Prof. Alfred Pischinger MD, as a professor of Histology and Embryology at the University of Vienna, presented his work describing the Ground Regulation Matrix as a communication system spreading throughout the entire human organism.

Pischinger's system of ground regulation, described in *Matrix and Matrix Regulation*, provides a model for explaining the dynamics of lymph flow relative to the extracellular matrix. The lymphatics and lymphatic organs are connected with the extracellular matrix and are responsible for the removal of wastes. Thus, regulation of the extracellular fluid matrix is part of every inflammation and immune defense process and all basic vital functions of the body.

According to Pischinger, *"everything that comes out of the blood takes a somewhat complicated route through the connective tissue to the parenchymal cells and then into the lymphatic system."*

Toxicity of the connective tissue and related lymphatics causes extensive damage to the meshwork of high-polymer, sugar-protein complexes and structural glycoproteins (collagen, elastin, fibronectin, laminin, etc.). This, in turn, reduces the connective tissue's ability to act as a molecular sieve through which cell metabolites are designed to penetrate.

The ECM is the largest system penetrating the organism completely. It takes care of the nutrition of the cells (internal circulation) and the removal of waste products from them. Thus, it regulates the "cell milieu system" and is at the same time part of every inflammation and defense process. It is clearly responsible for all basic vital functions, physically, mentally and emotionally. Since the lymphatic system is intermeshed throughout the entire organism, vital regulatory centers can be influenced by lymph therapeutics.

Unfortunately, the health-damaging effects of many "trapped" toxic environmental, deranged proteins and trans-fatty acids in the lymphatic system are neglected by most traditional and "holistic" practitioners.

All cells depend on the intact functioning of this system for their continued existence as it guarantees the environment they need for survival. Organic diseases originate in dysfunctions of this system and its connections, throughout the organism.

The effects of a variety of noxious substances on the basic system (rigid and subclinical processes, heavy metals, the effects of stress, etc.) have been subject to observation, and subsequent effective bioenergetic medical treatments for over five decades, using reaction/response measurement systems such as EAV, Kinesiology, Bio-resonance and others.

## The Cardinal Rule

Prior to detoxification, all channels (ECM/ICM) for drainage must be open and the patient must be nourished!

*In order for difficult and/or developing conditions to become accessible for treatment and effective resolution it is vital that the pathways for drainage are open prior to detoxification. Simultaneous to this process, a highly functional uptake system needs to be in place and provided for through the addition of stabilizing nutritional supplementation, bowel and digestion regulation, electrolytes, organ relief, hydration, ionic minerals, etc.*

# Restoring Cellular Communication Pathways™ (RCCP) Program

## The Program and its Benefits

### Opens the Case

Due to the increased polysystemic conditions being presented by our patients, the challenge we as healing arts' practitioners face is always the same, "what is the starting point here?"

Failure to find a correct starting point sets up false causal chain premises which may lead us down a variety of interesting rabbit holes but may not bring the required result we are seeking.

We must first establish a solid starting point, a foundational aperture through and upon which the case may be accurately opened and built.

### Unblocks and Opens the Channels of Drainage to Prepare the Body for Deeper, Safer Detoxification

All channels for drainage must be open prior to detoxification. This includes the primary "local" glands and organs of elimination e.g. liver, kidney, lung, colon, etc., as well as "systemic" pathways of elimination e.g. ECM (extracellular matrix) lymph, etc.

Both pathways (local and systemic) must be operating in concert with one another to prevent translocation and re-toxicification at deeper levels (see BioToxicosis).

#### ADDED BONUS

Dr. Patricia Fitzgerald's best selling book, "**The Detox Solution**" is included with this innovative and comprehensive program to provide additional education for your patient/client as they move through these foundational principles and processes with you. We are always here to provide you with encouraging support and clinical answers and counsel to assist you in your service to your practice.

### Clarifies Nutritional Uptake

Often in the practitioner's enthusiasm to get to the core of the problem, a key foundational step is missed. Patients not only present with polysystemic patterning, but are fundamentally nutritionally deficient in many areas.

Remember: nature abhors a vacuum. If something is going to be taken away, drained or detoxified for example, then something will rush in to take its place. If the drainage channels, both locally and systemically, are clearing at the correct levels then we are off to a good start.

If the patient is deficient in ionic trace minerals, enzymes, electrolytes, probiotics, amino acids, basic vitamins, etc, the healing process will be challenged. Without resolution, these factors, in combination with dehydrated and acidic cells, will become an obstacle to cure. Furthermore, the conditions with which the patient initially presented may be recreated or suppressed.

Of course dietary changes, exercise and attitudinal adjustments are integral to the process.

Practitioners report that re-establishing the nutritional foundation whilst opening the drainage pathways prior to xenobiotic detoxification brings substantial and sustaining results, regardless of the condition.

## Innovative & Exceptional MATRIX NUTRITIONALS (56)

The Matrix Nutritionals Series was designed as an eclectic offering for the Physica Energetics line of products primarily to assist in the “reactivation of the mesenchyme” (Dr. Reinhold Voll), via the nutritional complement pathways. These pathways are present in every system throughout the body and require balanced attention. In keeping with the principles of BioEnergetic Medicine, the products nourish and support these systems without punishing them with overstimulation or imbalancing factors, which ultimately, is counterproductive. This approach has been carefully and respectfully designed to provide the necessary natural (organic where available) synergistic factors in proper energetic and biochemical ratios, so that the products may assist in yielding a deep and lasting result. They are not to be confused with replacement therapy nutraceuticals that may seem to help for the moment, until the patient stops taking them or the causative factors are driven deeper. Physica Energetics' products honor The Legacy of BioEnergetic Medicine and are known by both patient and practitioner to be exceptionally effective and fast acting.

NOTE: Lyophilized Organic bovine glandulars are from Denmark, New Zealand and/or Argentina. These sources are fed and raised free-range, no antibiotics or growth hormones are used, and all are certified BSE-free. All tissue concentrates are free of fillers and binders.

### 5-HTP Liposome Spray

2 oz. Tincture

(Advanced Nanosphere Technology™ 110-130 nm)

*Two sprays contain:*

**5-Hydroxytryptophan** (Griffonia simplicifolia seed extract) 25 mg  
Non-GMO Sunflower Lecithin

**Vitamin B6** as Pyridoxal 5 Phosphate (PVP) 7.5 mg

*Liposome nutritional providing inhibitory neurotransmitter support.*

### Acetyl L-Carnitine

90 Veggie Capsules

*Each capsule contains:*

**Acetyl L-Carnitine HCl** 1000 mg (elemental carnitine)

*Nutritional support for brain and cognitive function including ADD/ADHD, Alzheimer's and poor circulation to the brain after stroke.*

### Adrenal LF

120 Veggie Capsules

*Two capsules contain:*

**Adrenal tissue** (Lyophilized glandular tissue) 250 mg  
**B5 Pantothenic acid** 100 mg  
**B6** 25 mg  
**L-Tyrosine** 250 mg

**Magnesium (Citrate)** 50 mg  
**Niacinamide** 15 mg  
**Potassium (Citrate)** 50 mg  
**Rhodiola Rosea** 250 mg (Standardized 3% Salidroside 1% rosavins)

*Glandular and nutritional support for the adrenal-thyroid axis.*

### Alkalize-C (Buffered Powder)

180 grams

*One teaspoon contains:*

**Calcium (Ascorbate)** 100 mg  
**Chromium (GTF)** 50 mcg  
**Lemon Bioflavonoid 10%** 10 mg  
**Magnesium (Ascorbate)** 160 mg  
**Manganese (Aspartate)** 5 mg  
**Molybdenum (Aspartate)** 100 mcg

**Potassium (Ascorbate)** 100 mg  
**Selenium (Aspartate)** 50 mcg  
**Vanadium (Aspartate)** 100 mcg  
**Vitamin C (Ascorbic Acid)** 4000 mg  
**Zinc (Aspartate)** 15 mg  
**Natural orange flavor**

*Non "bowel tolerance" buffered vitamin C alkalizing mineral beverage supplying additional minerals.*

### BioCatalase Liposome Lotion

4 oz. topical (Advanced Nanosphere Technology™)

**Arnica** 3X  
**Hypericum** 3X  
**Calendula** 1X  
**Witch hazel** 1X  
**MSM** (Methyl Sulfonyl Methane)  
**Boswellia**  
**Tea Tree Leaf oil**  
**Garlic Bulb extract**  
**Coconut oil**  
**Wood bentony**

**Emu oil**  
**Feverfew extract**  
**Chamomile**  
**Willow bark**  
**Safflower seed oil**  
**Capsicum (Cayenne)**  
**Pancreatin 8x**  
**Bromelain**  
**Superoxide dismutase (SOD)**

*Nutritional and Homeopathic support in the relief of inflammation. Can also be used as a topical for fungus and other conditions.*

## Bio-A Curcumin Phytosome

60 Veggie Capsules

*Each capsule contains:*

**Meriva™ 18-22% curcuminoids** (molecular complex of turmeric root extract and phosphatidylcholine (soy), 500 mg)

(Non-hydrogenated extraction removes all soy protein & other soy components/non-allergenic)

*Balancing natural inflammation strategies. Highest bioavailability.*

## BioCell Salts

12 Cell Salts' Combination *PLUS*

2 oz. Nutritional Tincture

*One full dropper contains:*

|                                 |                              |

| <b>Magnesium phosphorica</b> 3X | <b>Parathyroid</b> 6CH       |

*Nutritional and Homeopathic support in the relief of mineral deficiencies, neuro-endocrine and cellular health.*

## Bio-Omega 3

Fish Oil Concentrate Supercritical CO<sup>2</sup> Extraction

60 Softgel Capsules

*Two softgel capsules contain:*

**Uniquely formulated ratio EPA/DHA 6.5:1** Fish oil concentrate  
**1600 mg**

Providing:

**Eicosapentaenoic acid (EPA)** 1040 mg

**Docosahexaenoic acid (DHA)** 160 mg

*Sustainable fish oil concentrates to support inflammation, cardiovascular, mood and behaviour.*

## BioHealth Matrix

120 Veggie Capsules

*Four capsules contain:*

|  |  |
|--|--|
| <b>Alpha lipoic acid</b> 100 mg                        | <b>Magnesium (Aspartate)</b> 50 mg                 |

## Hand Crafted *Spagyric* Botanical Tinctures

The practice of Spagyria requires the application of alchemical principles and precision methodologies for the production of botanical and homeopathic medicines. The word "spagyric" was coined by the 16th century medical alchemist Paracelsus.

It is formed from two Greek words: "spao" (to draw out) and "ageiro" (to combine). This meticulous method of extraction elegantly delivers all of the botanicals' natural, inherent nutritional and bio-energetic properties.

True *Spagyric* processing differs from ordinary tinctures and extracts, as the process incorporates the properties of the plant more completely.

It also demands that the quality of the raw material is of the highest in Nature, either organic wildcrafted or bio-dynamically farmed.

Paracelsus spoke about the aspiration of the Art of Spagyria:

*"...it has always been to produce sovereign essences".*

This approach to manufacturing is specific as it is delicate. Without consistent, excellent sourcing the tincture will separate and fall apart or be rendered inactive.

Most typical standard tinctures place the plant material in solution with an extracting medium, usually alcohol and other chemicals. After a short time, the liquid is filtered as the finished tincture and the *marc* (*core matrix of energy and nutrition*), or remaining plant material is discarded...!

However, throughout the *Spagyric* process, the primary elements of the liquid extract are separated by gentle distillation, purified, concentrated and then reconstituted. Each element is optimized through a specific time-sensitive process of natural fermentation to release the healing potential of the plant. This requires an ordered, cascading sequence of preparation and timing for each procedure to preserve the medicinal essences of the whole plant and provide balance for the now highly charged, raw material extraction.

The elemental residue is then reduced to an alkaline ash and run in solution so that all the bio-available trace elements are absorbed. This is then remixed with the original components including the marc, to once again become a "whole" balanced entity. No part of the plant is wasted. No essence of the plant is lost. The finished formula retains the plant's original constitution, but with much more strength, absorbability and healing potential than a raw plant.

These *Spagyric* preparations are done using alchemical principles in order to protect this healing life force. What is referred to as the sulfur of a plant is its intelligence; the mercury of the plant is life force. The salt is the body and the minerals of the plant.

This final reconstitution is known as "*the exaltation*" in alchemical terminology.

*The present allopathic approach seeks to quantify on the basis of specific amounts of what has been determined to be the active ingredient. However, inherent in the Spagyric approach is the recognition that the Vital Force created therapeutic value in both the material and the essential.*

*As such, each component and element of the plant continuum is recognized for its value as Vital components of the whole, the sum of which is greater than just the parts themselves. This is the art of "alchemy transmutatoria" as transcribed by Paracelsus, long ago. – Dr Robert Cass*

Because of the detailed intricacies of the specific steps involved and our faithful adherence to the natural cycles of the earth and its seasons, it can sometimes take up to 90 days to process a single batch of product.

Most companies, frankly, are not willing to invest such effort in their processing. We do... and it is well worth it!

This is the only chemical-free method of herbal preparation that extracts all of the plant's natural therapeutic compounds, including trace elements, glycosides, alkaloids, mineral salts, polysaccharides and essential oils.

This noble, hand crafting process offers you a rich, robust product full of aroma, without that slightly burned taste that is so apparent in many fast heat processed tinctures. You will be delightfully surprised to see the vibrant colours of the remedy, due in part to the *Spagyric* process which virtually eliminates the botanicals' exposure to molecular changing oxidation.

The end result recreates the synergy of the "whole" plant now, revealed as an intensely concentrated, highly bio-available remedy, both physically and energetically. (Many practitioners feel that this unique process releases inherent energetic patterns which are unavailable and consequently inaccessible to body, mind and heart through the typical assimilation pathways).

Clearly, potency and range of healing potential is dramatically increased as the resulting tincture is easily assimilated and well tolerated by all ages. Practitioners report that these remedies are easily two to three times stronger than standard tinctures, making them exceptionally cost effective.

Results always speak for themselves.

## INTRINSIC SPAGYRIC BOTANICALS (33)

These hand-made, Spagyric botanical products are manufactured in accordance with the proven laws and time-honoured processes laid down hundreds of years ago. All of the raw-materials used in the preparation of these superior products are bio-dynamically grown or wild-crafted, and draw from the finest ancient and modern traditions of herbal medicine from the West, Ayurvedic India, South American Amazon, and Traditional Chinese Botanicals. It often takes between 60-90 days to prepare the concentrated tincture, which has been decanted into a protective cobalt blue bottle. Labelling and bottling are performed without electricity, resulting in the most pure and highest quality remedy available.

“Everything  
**vibrates** at a  
certain and  
specific  
frequency within  
the context of  
the **WHOLE**”

Dr. Robert Cass

*In 1796, a German doctor named Samuel Hahnemann discovered a new type of approach to the cure of the sick, which he named homeopathy (from the Greek words meaning 'similar suffering').*

*Like Hippocrates two thousand years earlier, he realized there were two ways of treating ill health:*

#### **The Way of Opposites**

*(The approach most commonly used by conventional medicine)*

#### **The Way of Similars**

*(Natural medical approaches as demonstrated through homeopathic laws and principles)*

#### **Detoxifier Homaccord Tincture**

#### **Drainage Tonifiers**

#### **Organotherapy Sarcodes**

#### **Flower Essences**

#### **Phenolics**

## **Homeopathic Preparations**

Today, more than 200 years after its initiation, homeopathy is enjoying a wonderful renaissance in spite of almost being eliminated by financial and other warring factions within and without the healing arts' world. This resurgence is due, in part, to the requirements of an ever changing wellness landscape that has become increasingly compromised and poly-systemically complex. Physica Energetics' encompassing range of homeopathic products is well positioned to meet the clinical challenges with which the healing arts' profession is now facing.

Homeopathy has proven to be an effective system of healing which assists the natural tendency of the body to heal itself. It recognizes that symptoms of ill health are expressions of disharmony within the whole person and that it is the patient who needs treatment, not the disease.

In accordance with homeopathic principles, Physica Energetics' products do not treat disease. Each remedy has been specially crafted to assist in the removal of "obstacles to cure" as Hahnemann described them, while simultaneously "agreeing with" or supporting the expression of the Vital Force which ultimately, brings restoration of body, mind and heart.

Expertly chosen ingredients, customized and embedded within each formula, are uniquely responsible for providing the correct resonating frequencies needed to amplify the specific Causal Chain factors that are residing with your patients. In this way, the frequencies of the homeopathic ingredients are made to match the frequencies of the pathogenic influences which are creating obstacles to body, mind and heart.

Each formula is a specific, hand succussed, potentization of the mother tincture. Hand succession, or vigorous shaking, as per Hahnemann at each step of potentization is a vitally important component in the manufacturing process. This step causes agitation at a molecular bonding level and energetically activates the remedy to produce better results with fewer side effects. Some practitioners refer to this process in terms of dilutions, but this really is a misnomer for they are in fact "potentizations", clinically designed to provide an accurate and target-specific remedy.

Physica Energetics' homeopathic products bring the power of attenuated or detoxifier homaccord tinctures, drainage tonifiers, organotherapeutic sarcodes, flower essences and phenolics to your practice. Additionally, Spagyric botanicals in low potentizations are included in many of the products to provide additional drainage and reconstitution.

These wonderful products seamlessly integrate into any size or type of practice. You will find them fascinating in their formulation and exceptionally effective in their application.

Our products are produced under the strict rules of the British, German and American Homeopathic Pharmacopeia and have been awarded the international and highly respected, homeopathic medicine identification licenses (NPN) by Health Canada. You may already know that Canadian standards and strict regulatory commissions are among the most stringent in the world.

This requires an exhaustive, detailed submission and licensing process whereby every ingredient in the formula is catalogued according to source, manufacturing procedure, testing standards and qualified references from peer reviewed homeopathic medical journals and professionally accredited international colleges and institutions.

We are proud of this prestigious and distinctive classification which certifies that our products are not only compliant with international government authorities, but assures the practitioner of our commitment to excellence, sustainability and quality.

## DRAINAGE TONIFIERS (11)

Drainage is central to the healing process. It has been widely recognized that until the ECM (extra cellular matrix) is clarified, cellular resolution will not be complete. BioToxicosis products Lymph 1, 2, and 3, assist in the clarification of systemic drainage pathways; Spagyric botanicals decongest and detoxify at the physical level whereas the Milieu Series provide *homeopathic drainage at the point of focal interference*. Utilizing this combination, the local and systemic ECM drainage pathways are liberated and healing is the natural result as obstacles to cure are no longer an issue. All product ingredients are hand crafted from mother tinctures, hand potentized per Hahnemann and hand succussed. *As an added bonus feature, the Milieu Drainage Tonifiers also contain specific flower remedies designed to assist in the clarification of the emotional terrain.*

## ULTIMATE FLOWERS (2)

Ultimate Flowers are homeopathic, Spagyric preparations of the emotional flower products that were initially attributed to Dr. Bach. All ingredients are hand crafted from mother tinctures, hand potentized per Hahnemann and hand succussed. These essences are all in 30CH potency and were designed specifically to be custom potentized or custom grafted.

Note: **Pineal 6CH** and **Thymus 6CH** sarcodes have been added to the *Ultimate Fields* and *Ultimate Rescue*. The pineal gland is the focal point for the endocrine system through which the Vital Force specifically differentiates. The thymus gland represents the subconscious access and pathways. **ATP 5X** is present for homeopathic empowerment factors/Krebs cycle.

| <b>Star of Bethlehem</b> 30CH |                   |

Homeopathic flower remedy to assist with shock, grief and trauma; Spagyric "Rescue Remedy".

**TIP:** Many practitioners give the *Ultimate Fields* and *Ultimate Rescue* together.

*Ultimate Fields* works at the deeper chronic level, while *Ultimate Rescue* provides immediate support throughout the day.

#### Fully Customizable!

EAV practitioners can find the specific flower remedy in their instruments and imprint the frequency(s) into the *Ultimate Fields* thereby fully customizing an emotional remedy for the patient without having to give the patient several different remedy bottles.

Other practitioners may wish to "graft" from other mental/emotional sources (3 drops) into the *Ultimate Fields* to accomplish a somewhat similar purpose. For example "graft" 3 drops of Cerato, Holly, and Cherry Plum into the *Ultimate Fields*.

## ULTIMATE PHENOLICS (1)

A doctor once reported that, "... phenolics are what makes life worth living". They are the colours, flavours, smells, natural preservatives, neurotransmitter and hormonal expressions of the Vital Force. They are also the reactive agents in foods, allergies, supplements, drugs, chemicals, perfumes, pesticides, herbicides, insecticides, dental products, pollens, dust, mold, etc. Phenolics may be inhaled or ingested in large amounts and are often processed slowly by compromised detoxification systems thereby creating sensitivity challenges for people. *Ultimate Phenolics* was created using a similar approach as the *Ultimate Flowers*. All ingredients are hand crafted from mother tinctures, hand potentized per Hahnemann and hand succussed. These nosodes are in homaccord potencies and were designed specifically to be custom potentized or custom grafted.

Note: ATP 5X for homeopathic empowerment/Krebs cycle and Mesenchyme 6X, 9X, 6CH to assist with ECM (extracellular matrix) drainage.

Homeopathic remedy to assist in the resolution of phenol sensitivities.

#### Fully Customizable!

EAV practitioners can find the specific phenolic remedy in their instruments and imprint the frequency(s) into the *Ultimate Phenolics* thereby fully customizing a desensitizing remedy for the patient without having to give the patient several different remedy bottles.

Other practitioners may wish to "graft" from an existing phenolic remedy (3 drops) into the *Ultimate Phenolics* to accomplish a somewhat similar purpose. For example "graft" 3 drops of GABA, Coumarin, Apiol, etc, into the *Ultimate Phenolics*.

## Detoxifier Homaccord Tinctures (31)

The Detoxifier Homaccords presented in this section are a combination of classical homeopathic preparations, which may include nosodes, isodes, sarcodes and potentized botanicals all designed to differentiate, constellate, and amplify the keynote focus of the remedy. All ingredients are hand crafted from mother tinctures, hand potentized per Hahnemann and hand succussed. Many ingredients are in multiple potencies known as attenuations or homaccords, to provide for the processes and patterns of homeopathic ascendancy. Products are stored in protective cobalt blue bottles, and labelling and bottling are performed without electricity, keeping the products clear and pure.

# ORGANOTHERAPY SARCODES (12)

In Greek, the term 'Sarcodé' means fleshy. Sarcodes imply protoplasm of animals, as distinguished from vegetable protoplasm. Sarcodes are used for the homeopathic support and correction of the indicated substance by providing the correct oscillatory signature of a healthy, well functioning gland or secretion. This unique aspect of homeopathy is designed to provide the body with a "blueprint" of what a healthy organ, gland or vital fluid should be. In other words if an adrenal gland is over or under active then a "sarcodé" will homeopathically represent the design of a healthy adrenal gland to encourage the under active gland to develop correctly.

A strategic blend of X and CH potencies and accompanying "classical homeopathic" ingredients are included in the product. All ingredients are hand crafted from mother tinctures, hand potentized per Hahnemann and hand succussed. *Note the inclusion of flower essences in certain organotherapy products, appropriate to the target gland, organ or system.*

The

# Academy of International BioEnergetic Sciences

Progressive Clinical ElectroDermal (EAV)  
Screening Skills, Techniques & Protocols

## Removing Obstacles to Cure Through Mesenchymal Reactivation

EAV/EDS training has been mostly in the hands of companies who have sold the instrumentation. With very few exceptions, this very basic training has been insufficient for those who are in clinical practice. Several leading EAV practitioners recognized this need and have partnered with the Academy of International BioEnergetic Sciences, founded by internationally acclaimed EAV practitioner and Naturopathic Physician Dr. Robert Cass (Canada), to provide candidates at all levels of proficiency with the necessary tools and skills to achieve a greater level of technical expertise and clinical mastery.

As a student of the Academy, you will enjoy personal attention and ongoing mentoring throughout the year, receiving instruction from a stellar team of presenters bringing with them years of clinical and teaching experience in the Art & Science of BioEnergetic Medicine.

Dr. Robert Cass is the primary instructor at all of the EAV sessions in Canada, USA and UK. Additional expert EAV practitioners and teachers will also be present as subject matter warrants.

Upon completion of these sessions, you will have gained a greater level of assurance, confidence and authority to meet the increasing health challenges with which are being presented.

The EAV Academy sessions convene over 4 long weekends throughout the year. Concise, clinical EAV lectures and presentations are each followed by a lab session to provide you with practical experience relative to the topic. Extensive notes and protocols accompany each section.

## Accreditation & Continuing Education Credits

The Academy of International BioEnergetic Sciences is an accredited and board certified college. Successful delegates are eligible for continuing education credits and also for certification as a Holistic Healthcare Practitioner, HHP, by the American Association of Drugless Practitioners. Qualified candidates may be eligible for certification with the American Alternative Medical Association.

Avatar, Asyra, BioMeridian, EDS 2000, IHT, IQS, Kindling, RM10, Star Teck, ZYTO, etc.

## Refining Skills, Techniques & Protocols

This foundational session is necessary to lay the groundwork and prepare you for the clinical sessions to follow. In this session you will learn accurate & reproducible point testing, prescreening protocols and techniques; amplification, filtering & layering protocols; advanced interpretation & prioritization; unlocking cloaked disturbances and causal chain; homotoxicology and biotoxicosis; imprinting/inverting; allergy testing; spot checks; natural remedy protocols; short cuts; and how to perform a full body test, complete with remedies, in 15 minutes!

## Core Foundational Hormonal Strategies

Hormonal regulation is at the centre of a high percentage of our EAV work as the endocrine system is the governing core of the body, mind and heart. Causal chain elements create exponential imbalances throughout the system due to disruptive xenobiotic influences which, through EAV, can be energetically corrected utilizing hormonal bio-direction and metabolic drainage pathway clarification. Particular emphasis will be on sex hormone and adrenal/thyroid imbalances.

## Heavy Metal & Toxic Dental Complexities

Father of EAV, Dr. Rheinhold Voll believed that 75-85% of the foci for disease was rooted in the odontoma structures. This is a complex yet rewarding facet of EAV. Course material will include tooth anatomy; biocompatibility testing; dental heavy metals and amalgams; root canals and xenobiotic identification; sarcoid imprinting; NICOs (neuralgia inducing cavitation osteonecrosis) screening; interfacing with dentists, etc. Other aspects of this session include Attention Deficit Disorders, Autism, MS, Fibromyalgia, Chronic Fatigue Syndromes, ME and other heavy metal conditions.

## Innate & Acquired Immune Insufficiencies

Immunologically compromised conditions are increasingly difficult to assess, as they are fundamentally poly-systemic in nature and are "cloaked". Techniques and natural, clinical interventions will be presented to illuminate deep core issues and unlock the power of the immune system thereby unraveling complex and hidden, chronic patterns of gross imbalance. Topics include Mycoplasmas, stealth virus, H/N flu, IBS, Crohn's, vaccinations, leaky gut, H-pylori, etc.
